Next Review Date	2026-06-13
Revision	Rev 4.1

1. Purpose

Blend water, syrup, and CO2 to create a finished carbonated beverage product meeting Brix, pH, CO2, and microbiological specifications.

2. Scope

Mixing department operators.

3. Prerequisites and Requirements

3.1 Training Requirements

- Mixing and carbonation training
- CO2 safety training (SOP-SAF-001)

3.2 Tools and Materials Required

- Calibrated instruments as listed in the plant calibration schedule.
- Appropriate PPE as specified in Section 4.
- Completed permit-to-work (if required for maintenance activities).
- Access to relevant equipment manual and P&ID drawings.
- CMMS access to create and close work orders.

4. Health, Safety and Environmental Requirements

! WARNING

This SOP must not be carried out without appropriate PPE and, where required, a valid Permit to Work (SOP-SAF-006). If in doubt about safety, STOP and consult the Safety Officer (EMP009 / EMP017).

4.1 Identified Hazards

- CO2 (asphyxiation risk at concentrations >5% vol) - monitor GD101
- Cold product at 2-4°C - skin hazard and slip risk
- Pressurized systems (up to 6 bar CO2) - release risk

4.2 Emergency Response

In case of any emergency during this procedure: Press the nearest Emergency Stop, alert personnel in the vicinity, call the Safety Officer and Shift Supervisor. Refer to the Emergency Response Plan (SOP-SAF-004) and site evacuation procedure.

5. Detailed Procedure

5.1 Pre-Task Verification

1. Confirm the relevant equipment is available and no conflicting activities are planned.
2. Check shift handover log for any outstanding issues with this equipment.
3. Verify all required materials, tools, and chemicals are available and correctly labelled.
4. Obtain all required permits (PTW, hot work, confined space as applicable).
5. Brief all involved personnel on this SOP before starting.

5.2 Main Procedure

1. Perform pre-task briefing with all involved team members.
2. Verify relevant equipment status on SCADA - confirm normal operating condition.
3. Carry out the main task following the equipment manual and technical drawings.
4. Check results against the acceptance criteria specified in Step 6 (Quality Checks).
5. Record all observations, measurements, and parameter readings in the plant log.
6. Notify the shift supervisor upon task completion and confirm handover.
